### Swords Central Post Office - Dublin

Swords Central Post Office, located in the Pavillions shopping centre, is a state of the art facility which will greatly enhance the service on offer to businesses and the general public in the North Dublin community.

The new Central Post Office is 2,500 square feet with a mezzanine of a further 1,100, offering a new and improved customer experience.

LC SmartGlass is used for the screen which separates the managers quarters from the shop floor.

Due to the nature of this facility, where tender is being exchanged, safety and security were at the forefront of this projects design.

Switched On

Switched Off

SmartGlass International were able to exceed each design requirement of offering a practical and secure solution which is aesthetically pleasing to fit in with the surrounding modern décor.

The LC SmartGlass used is a toughened security glass, offering protection to the back of house areas located behind the screen.

When the LC SmartGlass is switched on the screen becomes clear and full visibility allows management to monitor the shop floor. When the glass is switched to off, management can enjoy a private workspace instantly.

The Building Better Healthcare Awards will be taking place on Thursday 11th November at The Brewery in London.

Now in its 12th year, the BBH Awards continue to raise the bar in healthcare building design, by recognising and celebrating all the very best achievers throughout the field. The BBH Awards are among the most respected awards in the healthcare built environment.

SmartGlass Medical will be sponsoring the drinks reception at these prestigious awards.
