A big welcome to Martin Potter who starts with SmartGlass International this month as International Sales Manager

Martin can be contacted at [m.potter@smartglassinternational.com](mailto:m.potter@smartglassinternational.com)

Top Gear Live is the live arena show of the award winning TV program Top Gear.

Ever since it made its live debut on the World Stage in 2008 Top Gear Live has been seen by over 1,000,000 fans and is continuing to push the boundaries of car theatre.

"This show is like nothing we have done before. It will have some very very special, special effects," Jeremy Clarkson.

For the 2010 show, Top Gear producers wanted to create the ultimate car to star in the finale of the live show. After much debate regarding model, materials, specifications etc. they decided on an almost impossible concept.

"A car will come out and become invisible" Richard Hammond.

LC SmartGlass was used to create the body of the car which would switch from clear to opaque simultaneously during the show to give the effect of an "invisible car".

A total of 29 LC SmartGlass panels were used to make up the body of the car.

The famous "Stig" was in the drivers seat of this state of the art vehicle and performed a series of stunts in the car all the time as the glass was switching state.

This scene was the finale of the live show and lasted for approximately 6 minutes with the glass car stealing the stage.

For more information on this exciting Smart Glass project visit the case studies section on

[www.smartglassinternational.com](http://www.smartglassinternational.com).

## SmartGlass Online

SmartGlass International case studies are now available to download on [www.smartglassinternational.com](http://www.smartglassinternational.com)

Follow the latest projects here...

Visit us online for all the latest SmartGlass news/ events as they happen.

Log on to the website to view our project portfolio gallery where you can explore the range of different SmartGlass applications.

Want to know more about SmartGlass International?

Drop us an email and we will respond to your query promptly.

## What's in store for 2011...

- Log on to SmartGlass International online to see our website transformation.
- A series of new case studies will be available online for download in the new year including a case on SmartGlass Internationals largest project to date!
- New interactive showroom - take a tour through our virtual showroom to see our products in action.
